COMMUNICATION.

HEADQUARTERS, STATE OF NEVADA,
ADJUTANT-GENERAL'S OFFICE, CARSON CITY, January 1st, 1866. }

To His Excellency, H. G. Blasdel, Governor of Nevada.

SIR:—I have the honor to transmit herewith, my report as Adjutant and Inspector General, from the time of my appointment in March last, to this date. In making the same, it has been the object to be as brief as possible.

That brevity, however, has not been allowed to preclude statements in detail, which, it is confidentially believed, will be amply sufficient for information in regard to the transactions in this branch of the Executive department of the State government. No records, papers, or documents of any importance having been received in this office from the late Territorial government, much difficulty was experienced in organizing and systemizing the business of this department. It is not therefore entirely improbable that a closely critical examination may reveal errors alike of omission and commission, in this report.

It is apprehended however, that none material exists, and that the same will be found a compend of all matters necessary to a proper understanding of the Military operations of Nevada from the commencement of the rebellion to this period.

I remain, sir, with much respect,

Very truly your most obedient servant,

JOHN CRADLEBAUGH,
Adjutant-General,

Ex officio Inspector General, &c., of Nevada.

The casualties which have been reported to this department as occurring to our volunteers during the last summer campaigns, are as follows: Isaac W. Godfrey and James Monroe, both of Company D, First Nevada Cavalry, were killed in battle with Indians at Godfrey Mountain, Humboldt County, May 20th, 1865; Henry E. Botell, of Company D, and William Rafferty and James E. Dickerson, of Company E, First Nevada Cavalry, were severely wounded in skirmishes with Indians, on account of which they were honorably discharged from the service.

By reference to the roster, it will be seen that the number of deaths occurring to our soldiers, by disease and otherwise, since their entering the service, exclusive of those killed by Indians, is twenty-five.

The average length of time served being something more than two years, and the character of the service during that period requiring great exposure, this small mortality speaks well for both the sanitary arrangements in our military service and the healthful character of our mountain country. In this connection, I deem it not inappropriate to refer to a gallant officer, who, though not a volunteer from our State, yet lost his life in the service of the country, while in defense of and aiding to protect the lives and property of our people. I refer to the lamented Col. Charles McDermit, Second California Cavalry Volunteers, lately in command of the military forces of the Government in the service in this State.

Although we were not favored with a personal acquaintance with him, yet from the kind manner in which we have so often heard his name mentioned, with sorrow and regret, by both officers and privates of the Nevada Volunteers lately under his command, we have felt that this allusion is but a feeble tribute to the memory of that truly worthy gentleman.

Should this intended mark of respect be looked upon as a waif or an estray, let it be considered a stray leaf—a wild flower from Nevada's mountains—emblematic in its purity of the character and virtues of the deceased, which is cast into the grave of the truly gallant soldier.

The Territory and State Legislatures having provided by law for the payment, from the State Treasury, to the commanders of companies, a bounty of ten dollars for each recruit enlisted, and for monthly pay to the officers and privates, as follows: Colonel, fifty dollars; Lieutenant-Colonel, forty-five dollars; Major, forty dollars; Captain, thirty-five dollars; Lieutenants, twenty-five dollars; and Privates, each five dollars, from February twentieth, one thousand eight hundred and sixty-four, until discharged from the service. The accounts for which service and pay were required to be kept in this office, and be certified by the Adjutant-General to the State Board of Examiners. Much of the time and labor of this office has been required during the past summer in making up and certifying such accounts.

The amount certified to Commanders of Companies on account of recruiting bounty is.....	\$ 4,530 00
Certificates to Officers as monthly pay.....	10,979 19
Certified to Privates as monthly pay.....	55,252 49
Making a total amount of claims examined and certified from this office during the past summer, amounting to..	\$70,761 68
To which add the amount of claims certified to Officers on bounty, as Recruiting Agents, by Adjutant-General Russell, amounting to.....	\$7,610 00
Giving an aggregate of certified claims against the Soldiers' Fund, amounting to.....	\$78,371 68

From a careful examination of our rolls and accounts, the uncertified claims against the Soldiers' Fund, on the first day of January, one thousand eight hundred and sixty-six, are as follows:

Officers on account of bounty.....	\$ 420 00
Officers' monthly pay.....	5,895 00
Privates' monthly pay.....	20,235 50
Giving a total of uncertified claims on January 1st, 1866, of..	\$26,550 50

And making the entire liability that has accrued to Nevada, by reason of her laws to encourage enlistments, amount to the sum of one hundred and four thousand nine hundred and twenty-two dollars and eighteen cents. Say that there has been paid from the State Treasury, on the first of January, one thousand eight hundred and sixty-six, the sum of thirty-four thousand and sixty-three dollars and fifty-one cents, there would remain outstanding, either in warrants or claims, against the Soldier's Fund, a liability amounting to about seventy thousand dollars.

The stupendous war in which the Nation has been engaged having been brought to a successful termination, the volunteers from this State, will probably be mustered out of the government service in a very short time. The gratitude of all loyal citizens is due to our patriotic soldiers for their services in behalf of the nation, and will follow them in their retirement.

A thousand battle fields having attested the indomitable courage and valor of American troops, their ardor and self-sacrifice, and developing to the world the astonishing rapidity by which our peaceful citizens, unskilled in the arts of war, are suddenly transformed into good soldiers, we are justified in believing that the same qualities which made them such will prompt them to again return to civil life as useful members of society.

There is no one thing that instils into the hearts of our people true patriotism, more than the idea that each man is himself a part of the government. The soldier when he goes to battle feels that the starry

banner which waves above him is his flag, and that as an American citizen the battle is his battle, which idea of individual interest it should be our policy to encourage, by securing to each citizen the largest participation in the affairs of the government consistent with our institutions. All restraints and limitations upon the right to exercise the privileges of an American citizen are in antagonism with the republican spirit of the age, and in conflict with the genius and spirit of our institutions, calculated to alienate and separate the people in affection and interest from the government, to wound and mortify their pride and destroy their veneration, patriotism, and love of country. The national honor having been vindicated, the supremacy of the laws established, treason overthrown, and the republic maintained as one glorious and free, in the very hour of triumph it will become us to deny by statutory enactment, to the returning veteran, that right held most dear by every freeman—the right to a free exercise of the elective franchise. It is therefore hoped, that if the odious law which requires a pre-payment of four dollars in coin as a condition precedent to the right of voting cannot be stricken from the statute books, it may at least be so modified that the men who have borne aloft in triumph the glorious ensign of the Republic, shall not be required annually to purchase with money the right to participate in the affairs of the government.

In May last, by special order from the War Department, recruiting for the Volunteer Infantry authorized to be raised in this State was discontinued, and the portion of the regiment at that time recruited was consolidated, the recruits for Company "D" were transferred as follows: twenty-seven to Company "A" and nineteen to Company "C," one Denis Ganon having deserted before the transfer.

Companies "D" and "E" and a detachment of twenty men of Company "F" Cavalry, were mustered out of service at Fort Churchill on the eighteenth day of November, one thousand eight hundred and sixty-five, and Company "B" Infantry, at Fort Ruby on the fifteenth of December, one thousand eight hundred and sixty-five, and Companies "A" and "C" Infantry at Fort Churchill, the first on the twenty-second, the other on the twenty-third of December, one thousand eight hundred and sixty-five. Lieut. Col. Milo George, commanding the Cavalry Battalion, was mustered out on the twenty-second day of November, one thousand eight hundred and sixty-five, leaving now remaining in the service, one Major, four Captains, six Lieutenants, and three hundred and nine enlisted men, as near as can be ascertained by our last muster rolls, at a monthly expense to the State of one thousand eight hundred and seventy-five dollars.

Experience has demonstrated that the law providing pay for our soldiers is defective, in this, that to give the soldier its full benefit he should be paid at the time and place of discharge. The amount to each is small and does not justify his visiting the State Capital for the purpose of securing his pay. Consequently, he sells his claim for a trifle. I would recommend, if it is possible, to obtain the money to pay the Companies at Salt Lake by the time they are mustered out; that the law be so changed that the payment be made at the place of their discharge.

MILITIA.

It is not yet possible to comply with the provisions of the Act of Congress in regard to reporting the organization, strength and condition of the militia of the State of Nevada. The law providing for such organi-

zation and enrollment was passed on the fourth of March last, but was not published in time to enable the Assessors to comply with its provisions at the time they made their assessments of property for the current year. At least, if they received the law in time, they have, with few exceptions, failed to comply with its provisions, or the clerks of the Boards of County Commissioners have been derelict in their duty of reporting the strength of the unorganized militia to their brigade headquarters or to this office. The law is deemed to be amply sufficient to compel the civil officers to discharge their duty in this respect, and it will be rigidly enforced the coming year.

The number of enrolled militia in the county of Ormsby is seven hundred and thirty-one; Esmeralda, five hundred and fifty; Churchill, one hundred and thirty-one—the only counties for which returns have been made.

On the tenth day of May the following general order was issued :

[General Order No. 1.]

GENERAL HEADQUARTERS, STATE OF NEVADA, }
 ADJUTANT-GENERAL'S OFFICE, CARSON CITY, May 10th, 1865. }

In compliance with the requirements of the fifty-sixth section of the Act of the Legislature, entitled "An Act to provide for the organizing and disciplining the Militia of the State," approved March fourth, one thousand eight hundred and sixty-five, the State is divisional and brigaded as follows :

First. The organized and enrolled militia of the State shall constitute one division.

Second. The organized and enrolled militia of the counties of Roop, Washoe, Ormsby and Douglas shall constitute the First Brigade; of the counties of Storey and Lyon, the Second Brigade; of the counties of Humboldt, Lander and Churchill, the Third Brigade; and the counties of Esmeralda and Nye, the Fourth Brigade.

By order of the Commander-in-Chief.

JOHN CRADLEBAUGH,
 Adjutant-General.

Subsequently to the issuing of General Order No. 1, appointments were made of officers, as stated in the Roster hereto attached, and commissions issued accordingly. Time, and the condition of affairs, has not allowed of anything much more than a paper organization as yet. It is confidently believed that, during the approaching season, the militia organization of the State will be made complete. The importance of an effective, well organized and disciplined militia, as well as a complete enrollment of the effective strength of the military, is of the greatest importance, as was well established at the outbreak of the great rebellion. Had it not been for the prompt response of the militia of the New England and Middle States to the call made upon them by the President at the breaking out of the war, it is doubtful if our Government could have been preserved. To the effective militia system of the State of New York alone are the people of the States greatly indebted for the preservation of the Government. It is not believed that we can have as effective a militia system, of course, as the older communities, growing out of the fact that so considerable a portion of our athletic enterprising population at present is of a transient character. In fact, this, in a great measure, has a very damaging effect upon our organized mili-

tia—the constant changes in the members prevent that proficiency in drill that would otherwise be acquired, and greatly disheartens and discourages the officers commanding. To remedy as far as possible the evil, and for the purpose of preserving the rising generation, that they may be in condition, if occasion shall require, for active military service, I would most respectfully recommend that the youth of our schools be instructed in military drill.

This could be enforced as a requirement in our common schools. In other schools and academies an inducement could be held out by giving them a portion of the proceeds arising from the school fund, and I would most earnestly urge that the law providing for the establishment of an Agricultural and Mechanical College be so changed as to provide a Military Department therein. In the schools and colleges of the Eastern States a military education is provided for, while the youth of Nevada will defer to none other in patriotic devotion to the country. It should be our pleasure and pride to foster and encourage their patriotic emotions, and so bring them up, that if necessity should ever arise, calling them into the service of their country, they would be able to compete with the citizens of other States in the achievements of distinction and honor, and reflect credit on their State. It is believed that a knowledge of the art and science of war, amply sufficient for all practical purposes, could be acquired in a military department of such school without detriment to the object intended in its establishment, and thus be instrumental in sending forth well drilled pupils, schooled in the duties of the soldier, to all parts of our State, and thereby infuse a military pride and spirit that would make efficient our militia system in time of peace, and effective in time of war. It would seem to be but a just tribute to the Government that has made such bountiful bequest of her domain for the education of our children, to use a portion of the donation in training them in such manner that, if necessity required, they would be able promptly to rally to her protection and defense. Experience has shown that the introduction of military discipline and gymnastics in schools is having a wholesome effect in invigorating and establishing the physical constitution, conducing to promptness, regularity and decision, infusing a martial pride and military bearing, and is not an irksome duty, but rather a pleasure to the student.

The school of the soldier, company and battalion, skirmishing, bayonet exercise, target practice, small sword and sabre exercise, parades, reviews, inspections, guard mounting, encampments, marches, etc., all have their enchantments and attractions for the ardent, hopeful youth growing into manhood. But above all, frequent lectures upon campaigns, battles, marches, military history and achievements, should not be overlooked. It has often occurred to me that herein was the great failure in the education of the American youth. Glowing descriptions of the achievements of our arms, and the grandeur and glory of our Government, by orations, lectures and addresses, should be frequently impressed on the minds of our youth as educators in patriotism.

Had such a course been pursued heretofore in all our institutions of learning, especially in the National Academy at West Point, it is doubtful if the rebellion would have taken so deep a root.

INDIAN OUTBREAK.

During last spring and the early part of the summer, the settlers in Humboldt and a portion of Lander and Roop counties, were much an-

noyed by the unfriendly feeling and warlike disposition of the Indians; their attacks upon passers on the highways, and upon the isolated ranches, murder of the inhabitants, and stealing and running off their stock. Quite a number of citizens were massacred by them in different localities.

Upon a call of the civil authorities of Humboldt and Lander counties, this department, by order of your Excellency, at the earliest possible moment, transmitted all the arms that could at the time be readily collected, to those localities, for the purpose of having them where they could be used in defending the settlers on the frontier.

The limited military of the National Government, then in the State, was called upon, and, also, the commandant of the military department of the Pacific, advised as to the condition of affairs and solicited to furnish us aid. In a short time the forces that were here were sent out to the Humboldt, and additional forces sent from California to their aid. Posts were established and, for the small number of troops, there was very much campaigning in the Indian country during the summer. The citizens of Humboldt also organized expeditions that went on hunting excursions after the Indians. From the reports we have received they were very severely chastised. Numbers were sent on a visit to the "Great Father" and the rest kept on the run during the summer. This Indian outbreak was greatly to be deplored, occurring at the time it did, it prevented the settlers along the Humboldt from putting in their crops, retarded the settlement of the rich agricultural lands of that section, prevented the development of the rich mineral resources of the whole northern portion of our State, and almost cut off communication and travel to the Boise Mines and Idaho country by that route. In fact, depressed all business in the thriving towns of the Humboldt country to such an extent, that it will require some time for them to recuperate. In these excursions against the savage, it is frequently difficult to distinguish between those deserving punishment and the friendly disposed Indians. Citizens becoming outraged at their inhuman and demon-like massacres, feel disposed to wage a war of extermination upon all alike.

This inclination seemed to prevail pretty generally in Humboldt during the past summer. Much credit is due to the Hon. A. P. K. Safford, Hon. E. F. Dunn and others, for their humane action in removing the more peaceably disposed Indians to localities where they were safe from danger of being destroyed by the more excited citizens. This must have been done at considerable personal sacrifice and expense, the Indian Department not being in condition to give any aid for the want of funds, and being unable to furnish supplies to subsist the Indians while making the removal.

Upon telegram from the Hon. A. P. K. Safford in regard to the apprehended danger, and desiring to know if aid could be had, the following response was made.

ADJUTANT-GENERAL'S OFFICE,
CARSON CITY, April 16, 1865. }

DEAR SIR:—The Governor directs me to say in reply to your telegram, that he has had a talk with Mr. Lockheart, the Indian Agent, in regard to the proposed removal of the peaceably disposed Indians in your vicinity to the Sink of Carson, on Carson river. Mr. L. thinks with some help they might get along at the Sink, but that the cost of removal and return, or furnishing of supplies while they were removing

would be very considerable, and that if it is at all possible it would conduce to economy to keep them where they are. The Agent has no funds of the government to use in keeping the Indians in any way.

It being a fact well understood that the appropriations made by Congress in past years had been exhausted in *operations on the Truckee*, and the probability being that the appropriation of the past inter will be intercepted and exhausted in the same *speculation* before it reaches the Agent, or is used for the benefit of the Indians. Neither has the Governor any fund appropriated by the Legislature for such purpose, but if the emergency requires it, directs me to say that you can draw upon him personally for the amount suggested by you, and he will endeavor to recover the same from the government.

* * * * *

I have the honor to subscribe myself, very truly yours,

JOHN CRADLEBAUGH,

HON. A. P. K. SAFFORD,

Adjutant-General.

Unionville, Nevada.

It is believed that with proper management and care on the part of the Superintendent of Indian affairs in times past, and the use of the bountiful appropriations of Congress to help the Indian, this dire calamity which has fallen upon a large portion of our State, might have been in a great measure averted.

During our existence as a Territory, lasting little over three years, something like eighty thousand dollars were appropriated by Congress for the Indian service in the State—the several Acts stating that the appropriation was “for the general incidental expenses of the Indian service in Nevada Territory, presents of goods, agricultural implements, and other useful articles, and to assist them to locate in permanent abodes, and sustain themselves by the pursuits of civilized life.” Although these liberal appropriations have been exhausted, the Indian remains wholly unprovided for. No abodes have been erected, no agricultural implements have been provided, and the fertile and beautiful reserves remain in a state of nature. These suggestions are made with the view of directing attention to the miserable condition of the Indians in our State, and to influence, if possible, such a policy to be pursued toward them as will not drive them, from sheer necessity, to commit depredations upon our outside settlements. Indeed, the game disappearing upon the advance of our settlements, which now extend to the most distant parts of the State, the destruction of the pine nut trees, and the occupation of all the grass-growing valleys, cause great solicitude on the part of the savage as to his future means of subsistence, and realizing no help from any source, he feels that he is justified in obtaining a support in some manner.

It has occurred to us, in several years experience on the frontier, that the entire Indian affairs of the country would be more efficiently managed by the military than by the civil branches of the Government. The Indian then receiving favors from Government would feel that he was receiving them from the same hand that would be raised to punish if he committed offense, and there could then be no conflict in the policy pursued toward them.

Since writing the foregoing, the Current Report of the United States Commissioner of Indian Affairs has come under our observation. If we were in doubt before, that part of the report referring to the condition of Indian affairs in our State satisfies us that we are correct in our sug-

gestions above made. The report is so much in conflict with what we have said, that it is worthy to be read by our people who are cognizant of what has transpired here, if not for instruction and information, at least (serious as the subject may be to Winnemucca) as a curiosity and for amusement. It requires a reading of the whole to properly appreciate it.

As showing the drift, we append the following extracts:

"Senator Nye, who as Governor and Superintendent *ex officio*, had been very successful in his administration of Indian affairs, was appealed to to assist, so far as he could make it convenient, in regard to several matters of importance, and, although no advices have been received, I entertain some confidence that the interests of the service have not seriously suffered. There has been from the first very little difficulty with the Indians of Nevada, partly because they are a very peaceable people, and partly because of the judicious course taken by Governor Nye in establishing special agencies to look after them, and prevent difficulties and disturbances, rather than to await their occurrence." * * * *

"I cannot see in the letter of instructions referred to, any satisfactory reasons for *selling the mill*. On the contrary, the fact that it had cost a great deal of money appears to me the reason why it should be put at work at the earliest day possible for the benefit of the agency upon the large stock of logs already provided. Neither can I appreciate the reason in the case of the Indians referred to (however it might apply to others), that they should be required to remove back from the line of the railroad. On the contrary, being willing to labor, as was shown by their industry in constructing the irrigating canal referred to above, they could have secured employment for a long time upon the railroad work. The sale appears to me to amount to little more than giving Leet the mill, with timber of immense value, with which to run it for ten years. But even if it had been proper to make this sale, it seemed strange that a Superintendent should be sent from Minnesota, where his services were needed, to Nevada, at great expense, to effect it, when it could have been done as well by the Agent at Carson or the Superintendent of California. I confess that I am groping somewhat in the dark in considering this subject, but I am sure I cannot be wrong in checking the consummation of the project; and I have instructed the Superintendent to *take immediate possession of the mill and logs, and all property* purporting to have been sold; and, unless otherwise directed by your department, I shall in no manner recognize this singular transaction."

The Commissioner has been acting as such for but a short time. His report shows him to be not only an able, but a very good man. All through his report he appears to be troubled about the *mill and farm*. There is to him some mystery about it. He is bewildered—"groping in the dark." To the Commissioner the mill is a perfect "little joker." "Here it is, and there it is!" "Now you see it; now you don't see it!" To make the matter short, Mr. Commissioner, the *mill* is really one of those Don Quixotte went out to battle with. It is all in the imagination. It is a myth. The same may be said of the farm. The thimble-riggers have had it their own way. The money has gone up on the "little joker." So let it go.

When Mr. Thompson, from Minnesota, was out here to sell the mill after making considerable search to find it, and being unable to do so, he made inquiry of one of our old Piute citizens, who is always truthfu

and never jokes, as to where it was, when he received the satisfactory information that "it had gone up the river to *spawn*, and would be down again in the fall; that if he would put a gill-net across the river, he would catch any amount of little mills, coffee mills," etc.

To be serious and plain, Mr. Commissioner, the money is gone. There is no mill, no farm, and you have only checked the consummation of a scheme by which some twenty thousand acres of the best timbered lands in the Sierras was endeavored to be acquired by scheming individuals.

The land is situate at the Pacific Railroad crossing of the Truckee River; is capable of producing billions of feet of timber, and millions of cords of wood. The country east, for six hundred miles along the proposed line of the road, being rich in minerals and devoid of timber; two hundred miles out on the proposed line lumber having usually sold at from two to three hundred dollars per thousand feet. The road once built, Winnemucca's timber lot will be worth a million of money.

It is hard to reconcile the report of the Commissioner with any other idea than that late prominent officials in the Interior Department have colluded with others here to capture the tempting bait above referred to.

The course of the Commissioner merits approbation, and when the good old doctrine, that "honesty is the best policy," comes to be generally realized and appreciated throughout society here, in that happy day you will receive the thanks of our entire community.

If it were at all probable that the course heretofore pursued in regard to Indian affairs in our State should be continued, peace to our settlements, and the salvation of the Indian, would make the matter of ample importance to justify the Legislature in memorializing Congress in regard thereto. It is confidently hoped, however, that the evil day is passed, and we are to realize better things.

The Legislature having made no appropriation or other provision, by law, for a Military Fund, and the law providing that the transportation of arms, and all expenses incurred on account of the militia, should be paid from such fund, it was somewhat perplexing to know by what manner the necessary moneys could be obtained from the Treasury to pay such expenses.

The Board of Military Auditors, therefore, on a bill presented by the Adjutant-General for one thousand dollars as a contingent fund, to cover amounts that had previously accrued, and such as might arise, approved and allowed such bill, and the same was drawn from the General Fund in the Treasury.

The account for the use of the same being as follows—the vouchers for disbursements having been passed and allowed by the Board:

1865.	<i>Adjutant-General—</i>	Dr.
April 29th....	To amount received as contingent to cover transportation, etc.....	\$1,000 00
		Cr.
March 17th...	By paid Fast Freight Company on transportation of ordnance to Austin.....	\$ 71 25
April 1st.....	By paid Adjutant-General for transportation of 2530 pounds of ordnance from Gold Hill to Star City.....	316 25
May 4th	By paid D. W. Spurgeon for gathering and packing arms at Genoa.....	3 00
May 4th	By paid Adjutant-General, traveling expenses to and from Genoa.....	6 00
May 5th	By paid W. T. Estes, transportation of arms from Genoa and Carson to Virginia.....	36 00
May 8th	By paid Wells, Fargo & Co., expressage.....	5 25
May 8th	By paid W. T. Estes, on transportation of 1,248 pounds ordnance from Virginia to Austin...	124 80
May 11th	By paid G. T. Hortop, for gathering and packing arms at Silver City	15 00
May 11th.....	By paid W. F. Wilson, stage fares, as per bill, while looking up and shipping arms.	24 00
May 11th.....	By paid Joseph Gilbert, cartage on arms and accoutrements.....	8 00
May 12th.....	By paid John Rock, on transportation of 1100 pounds ordnance from Virginia to Ragtown..	60 00
Dec. 20th.....	By expense of Adjutant-General on trip to Fort Churchill, in search of information as to ordnance, and in looking after ordnance supposed to be there.....	
	Amount of credits.....	\$669 55
	Balance on hand.....	330 45

Two other bills are outstanding, for which the vouchers have not been received.

The expense of gathering and transporting arms occurring at a distance from the Capital, such service requires prompt payment at the place where the service is performed, and creditors, with small demands, cannot in justice be paid with certified claims against the State, putting them to the trouble of sending to the Board of Military Auditors to procure the same.

The remaining balance above stated is now being expended in securing the arms and ordnance of the State. The ordnance matters are not in satisfactory condition. It is desirable to have the same, however, put in satisfactory condition at as early a day as possible, consistent with the discharge of duties required in the office.

An arsenal or proper place for safe keeping of the State arms ought by all means to be provided.

The deposit of the State ordnance at Fort Churchill has led to much

confusion, and the removal of the same, when called for from that locality, is attended with considerable expense more than would be otherwise incident thereto. It is hoped that we will be able to communicate with your Excellency specially on this subject in a short time.

Accounts covering the following amounts have been certified from this office, and allowed by the State Board of Examiners, against the General Fund:

For blank books, blanks, stationery, and freight on same.....	\$676 50
For seal, sign, stool, and other office fixtures.....	123 50
For expenses to Virginia on two trips.....	16 00
For postage	44 25
Office rent.....	308 00
Clerk hire.....	750 00
Expense of trip of Caulkins to Sacramento to procure proper books and blanks.....	50 00
For rollers for mailing blanks.....	5 00
For wood and lights, and preparing wood.....	73 50
For account of printing circulars and election returns for soldiers voting, and other printing.....	
Total, exclusive of printing.....	\$2,040 75

The law requiring payment for the commission issued to officers ought to be repealed. The honors of the office, of course, are not to be overlooked, but surely they are amply compensated for, by the time and trouble incident thereto, if not by the cost and expenses of the necessary equipment.

We have now remaining in the national service four companies of cavalry. It is believed they will be mustered out next spring. Upon the closing up of their accounts, this office will be relieved of much the greater portion of the labor required therein. By that time it is believed that this office will in every respect be in such condition that the office labors will be exceedingly limited, and the business could be turned over satisfactorily to a successor without prejudice to the public service.

In view of the general depression of business throughout our State, which of course must, to a certain extent, affect the finances of the State, as a matter of economy, it has occurred to me the duties required in this office could be transferred to some one of the other of the State officers, and be covered by a present existing salary. I would therefore most respectfully recommend that the office be abolished, and that provision be made, as suggested above.

JOHN CRADLEBAUGH,
Adjutant-General.

ROSTER

OF VOLUNTEERS IN THE NATIONAL SERVICE.

The names of the following officers appearing in the Roster of my predecessor, with the accompanying remark, "Commission Revoked," to-wit: Colonel First Infantry, Charles Sumner; Lieutenant-Colonel, A. W. Briggs; Major, John G. Paul; Surgeon, Charles Emmerson; First Lieutenant, John Bennet; First Lieutenant, J. B. Robinson, and others; and their names not being carried into the following Roster, for the reason that they were not mustered into the Government service, it is due to those gentlemen to say that there was no such thing as a "revocation of their commissions." Orders having been received from Department Headquarters to stop recruiting before the infantry regiment was filled, or the proper quota of men raised to authorize the muster in of the respective officers, they could not be mustered in, the army regulations prohibiting it. Any inference drawn from the remarks above referred to, reflecting on the character of the above gentlemen, is unwarranted.

ADJUTANT-GENERAL.

RECRUITING ACCOUNT WITH COMMANDERS OF COMPANIES.

Lieutenant Warner.....	D	Infantry....			Cradlebaugh.....				
Totals.....			1158	1214				\$12,140 00	\$1,030 00

NOTE.—Ten dollars being the amount allowed to the Commandants of Companies for each recruit, it is difficult to see how such error could reasonably occur in the demands allowed for such service. Had a record been furnished us of the outstanding certificates issued by our predecessor, we feel assured, in the instances in which we have over-certified, it would not have been done.
